# The dbt Accelerator
Transform Your Data Skills, Fast-Track Your Career

Unlock the potential of your data by experiencing the de-facto standard in data transformation. Join thousands of teams running dbt across all major data cloud platforms.

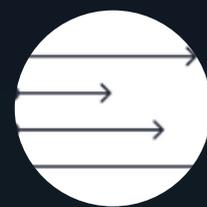

Mastering Data provides courses developed by experts in the field to enable data engineers, BI developers and solution architects extract the maximum value from their data assets

Students will gain foundational and expert level techniques to design, deploy and scale dbt, including:

The philosophy of dbt, analytics engineering and the modern data stack

Ensuring consistency and reliability in your data

Ship reliable data products and maintain their quality with automatic documentation, and visible lineage.

A on-demand intensive course covering:

Configuring your dbt project

- Connecting your data platform
- Organising your dbt project
- Configuring Sources
- Modularity at Work

Transforming data with dbt

- Incremental loading
- Advanced Materializations
- Reference Data Using Seeds
- Defining and running tests

Extending dbt

- Macros
- Packages
- Jinja
- Tagging

Deployment and automation

- CI/CD and DataOps
- Hooks and orchestration
- Deployment
- Generate documentation

Evan Benjamin

★★★★★

"Although I had been exposed to dbt at my Federal Consulting job, Adam's thorough introduction clarified how it works. His methodical teaching, which I was familiar with from his Snowflake Mastery training, was complemented by clear demos, well-answered questions, and practical integration of dbt and Snowflake. The course covered essential topics like building transformations, advanced materializations, and creating a mature dbt project. Now, I feel more confident in using dbt and am considering formal dbt Cloud certification, continuing to follow Adam's exceptional training materials."

"I recently completed a DBT course "DBT Accelerator Course with Adam Morton", and I am thrilled to share my experience. The course was exceptionally well-paced and easy to understand, making it accessible for learners at all levels. It was filled with relevant practical examples, allowing me to see the real-world applications of what I was learning. The course curriculum was meticulously structured, following a step-by-step approach from basics to advanced features. This progression made it easy to grasp complex concepts, and I found myself constantly relating the material to real-world scenarios. Adam was accommodating, patient, and incredibly knowledgeable about DBT and was always available to answer any questions and provided clear, insightful explanations that deepened my understanding of the tool. In summary, I highly recommend this course to anyone looking to gain a solid understanding of DBT and its practical applications as a transformation tool. It has been an invaluable learning experience for me.
